## Executive summary

The commitment to a better world is one of the fundamental pillars on which scientific research is based. Therefore, one of the objectives of this project is to develop skills in students that will turn them not only into leaders of scientific activities but also into agents that bring scientific advances closer to society. For this purpose, popular-science workshops are organized annually within the Project. This document will give details of the popular-science workshops corresponding to Year 1 of the Project.

**Disclaimer:** This work has been performed in the framework of the H2020 project ITN-5VC co-funded by the EU. This information reflects the consortium's view, but the consortium is not liable for any use that may be made of any of the information contained therein. This deliverable has been submitted to the EU commission, but it has not been reviewed and it has not been accepted by the EU commission yet.

## 1 Introduction

Within ITN-5VC project there are several dissemination and outreach activities that are scheduled in advanced. This is the case of the popular-science workshops, that are intended to bring the research carried out within the project closer to the community. This not only represents a benefit for society, but also for the researchers who can improve their work based on the comments they receive from the general public.

The Year 1 Project popular-science workshop was scheduled for September 2021, after all ESRs recruitment and was going to be presential. However, due to the COVID-19 crisis and the mobility limitations still existing even between European countries, the Project Management Committee decided in the 4<sup>th</sup> PMC Meeting to adapt this dissemination activity to the current circumstances.

Nowadays, social networks serve as a support not only facilitating the dissemination of content but also enabling the interaction of content creators with the community at a global scale. Taking these facts into account, it was decided that the ESRs prepare videos where they discuss the fundamental aspects of their research project and the activities they will carry out during the project. These videos have been published on the Youtube channel of the Project.

## 2 Year 1 Project popular-science workshop

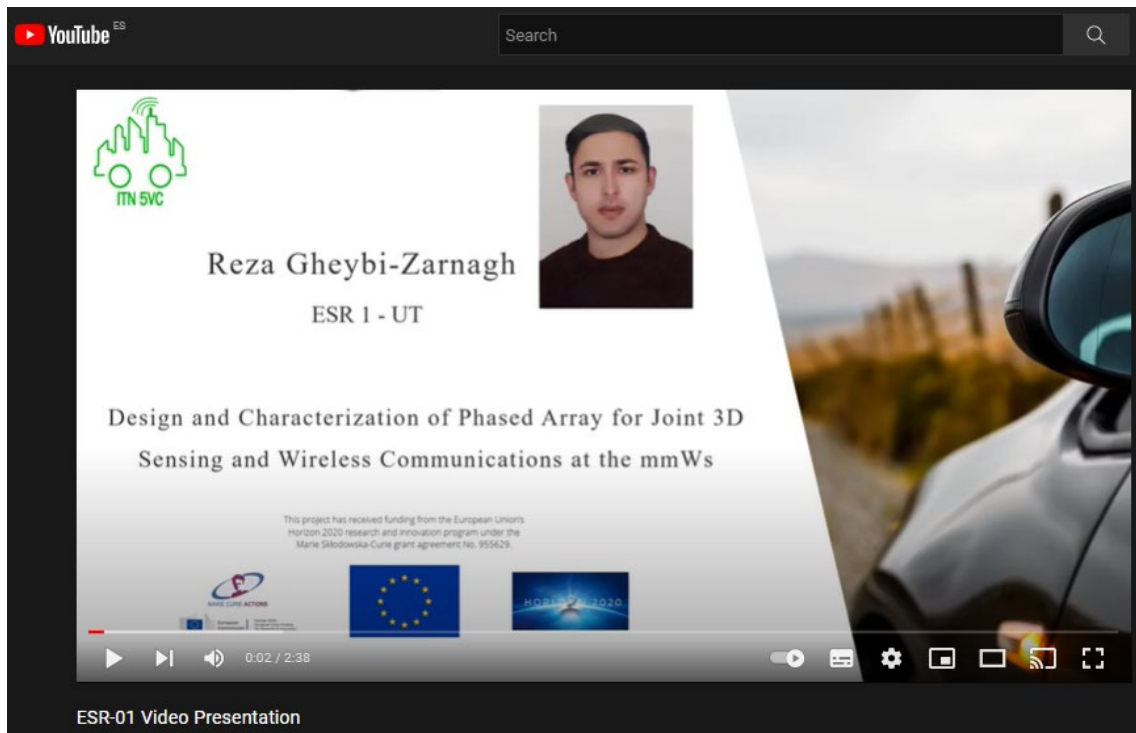

### Brief overview

- Host: UPV, VW AG
- Venue: Online
- Time: June 2021 – June 2022

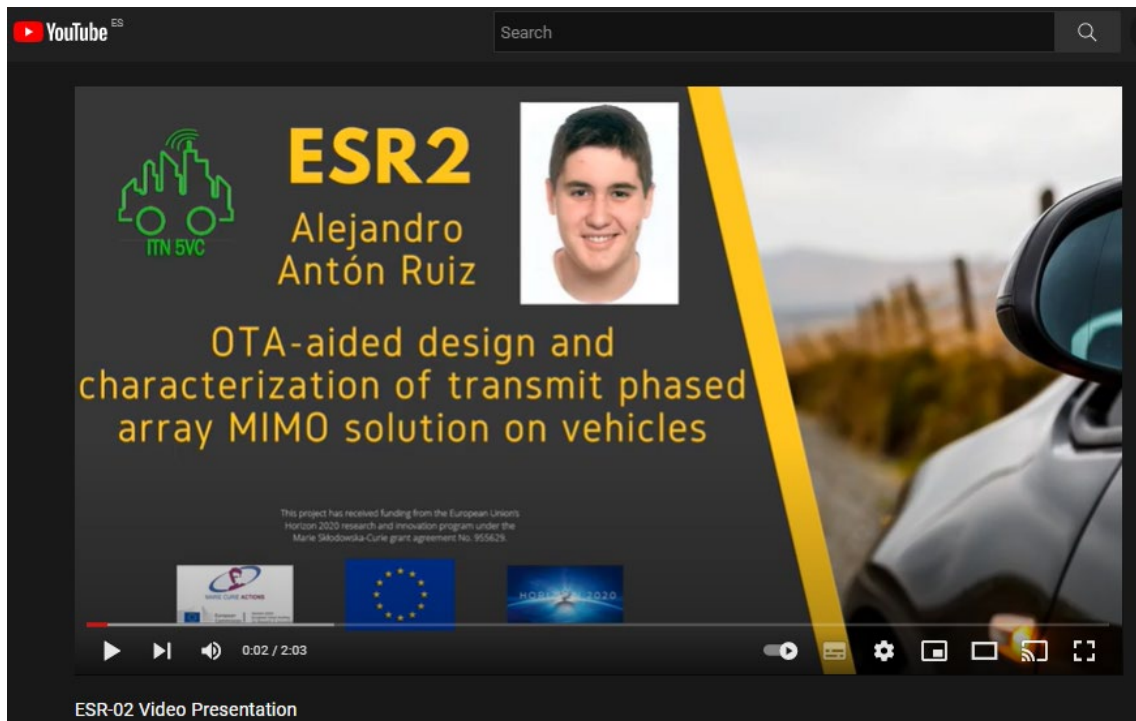

### ESR participation

Name	Participation
ESR1 Reza Gheybi Zarnagh	YES
ESR2 Alejandro Antón Ruiz	YES
ESR3 Coen van de Ven	YES
ESR4 Aamir Ullah Khan	YES
ESR5 Sayed Najaf Haider Shah	YES
ESR6 Yanet Estrada González	YES
ESR7 Nandan Dutta Chaudhury	YES
ESR8 Vishakha Shukla	YES
ESR9 Rubén Darío Riaño Álvarez	YES
ESR10 Yang Fu	YES
ESR11 Carlos Ravelo Pérez	YES
